Caring Crane:
A Medical emergency web application used for senior citizens in a desired location. The elder people can create a account in this app and if there is any medical emergency they could use this app and request help from the nearby nurse in that location.

Scentonomy:
Worked in the UI (User Interface) Enhancement of the screens as per the clients requirement
Inspidate:
Designed the wireframe part for this project. This is related to the students and mentors in a educational platform.
The students could login here and create account and view the list of mentors available. They have their own choice to select the mentors with the required subject and pay them for online classes.

NXZ WAV:
This project is related to the file conversion of Figma files to sketch files. As per the client requirement converted around 80 screens form Figma to Sketch files.
